Design review worksheet

Use a marked-up plan to record coordination decisions and questions for Cascade.

Project / site

Design stage / review date

Model / configuration

Drawing reference / revision

01 Location and access

Mark the unit position and access route. Which service clearances need confirmation?

02 Plumbing connections

Mark baths, showers, cisterns and floor levels. Record WC mounting and soil pipe handing if relevant.

03 Power, controls and heat recovery

Which electrical and control details are required? Record whether shower heat recovery is in scope.

04 Commissioning and maintenance

Who will check the installation and service the unit? Record the handover information required.

05 Decisions to close

Record each outstanding drawing or design decision, the person responsible and the date required.
